

CELLCYTE X

Live-cell imaging system inside your incubator

The CELLCYTE X is a high-throughput live-cell imaging system designed to make live-cell imaging more efficient, affordable and convenient than ever before. With three fluorescence color channels and enhanced contour mode for high contrast transmission imaging, CELLCYTE X provides maximum insight into live-cell experiments inside your incubator without the risk of disturbing the cells.

System Features

Enhanced contour and fluorescence microscopy

High resolution and contrast rich microscopy
3 fluorescence channels available

High-throughput scanning

6 slots for cell culture vessels

Assay compatibility

Run cell proliferation, transfection efficiency, apoptosis, cytotoxicity and many more assays

Image Acquisition and Analysis

CELLCYTE Studio

Automated acquisition and user-friendly image and data visualization software

Supports up to 96 well plates

CELLCYTE Analysis

Integrated real-time image analysis using smart algorithms

Image analysis supported

- Cell proliferation
- Cell count
- Nuclei count

Technical Specifications

Fluorescence Microscopy Channels	Blue	Ex 370-410 nm Em 429-462 nm
	Green	Ex 473-491 nm Em 502-561 nm
	Red	Ex 580-598 nm Em 612-680 nm
Enhanced Contour	Contrast rich transmission imaging mode	
Objective	10X	0.345 μm /pixel
Camera System	5 megapixel 0.66-inch mono CMOS sensor	2448 X 2048 pixels
Exported Image Format	TIFF	Time lapse and single image
Exported Movie Format	AVI	
CELLCYTE Main Unit (microscope)	Dimensions	34 x 41 x 50 cm
	Operating Conditions	10-40° C, RH up to 95%
CELLCYTE X Computer Unit	Dimensions	25 x 25 x 9 cm
	Internal Storage	10 TB
	Operating Conditions	Intended for indoor use 20-40° C
Power Input	100-240 VAC, 50-60 Hz, 70 W	
System Recommendations	OS: Microsoft Windows 10 Operating System (64-bit) CPU: 2 GHz or faster Intel Core Duo Processor RAM: 8 GB or more	Storage: 500 GB SSD (or larger) GPU: Nvidia GPU with 8 GB* of VRAM or more *Required for CELLCYTE Analysis.
